

# Strategic Public Procurement: The Portuguese Experience

Ana Vieira (ESPAP, Portugal)

May 29th, 2018

Sofia, Bulgaria

## 2007, the turning point

In 2007 Portugal started a major reform in the public procurement system

- Objectives:
  - To promote faster & cheaper & easier ways to deliver goods and services
  - To increase accountability & transparency & competitiveness & effectiveness & efficiency
- eProcurement as a strategic part of a broader reform in the legal, regulatory and economic aspects

## The 3 pillars of the reform

The reform of the Portuguese Public Procurement System (SNCP) was supported in 3 major pillars:

- The new Public Procurement Law of 2008 (CCP) \*
- The creation of ANCP, EPE (now ESPAP, IP), the agency that kept the role of managing authority of the SNCP
- The introduction of eProcurement (at least eTendering and eAwarding) on a mandatory basis:
  - for all call-offs under ESPAP's framework agreements
  - for public tenders

The intertwine of these 3 pillars was key for the success of the reform

*\* Revised only with effect on Jan1st, 2018*

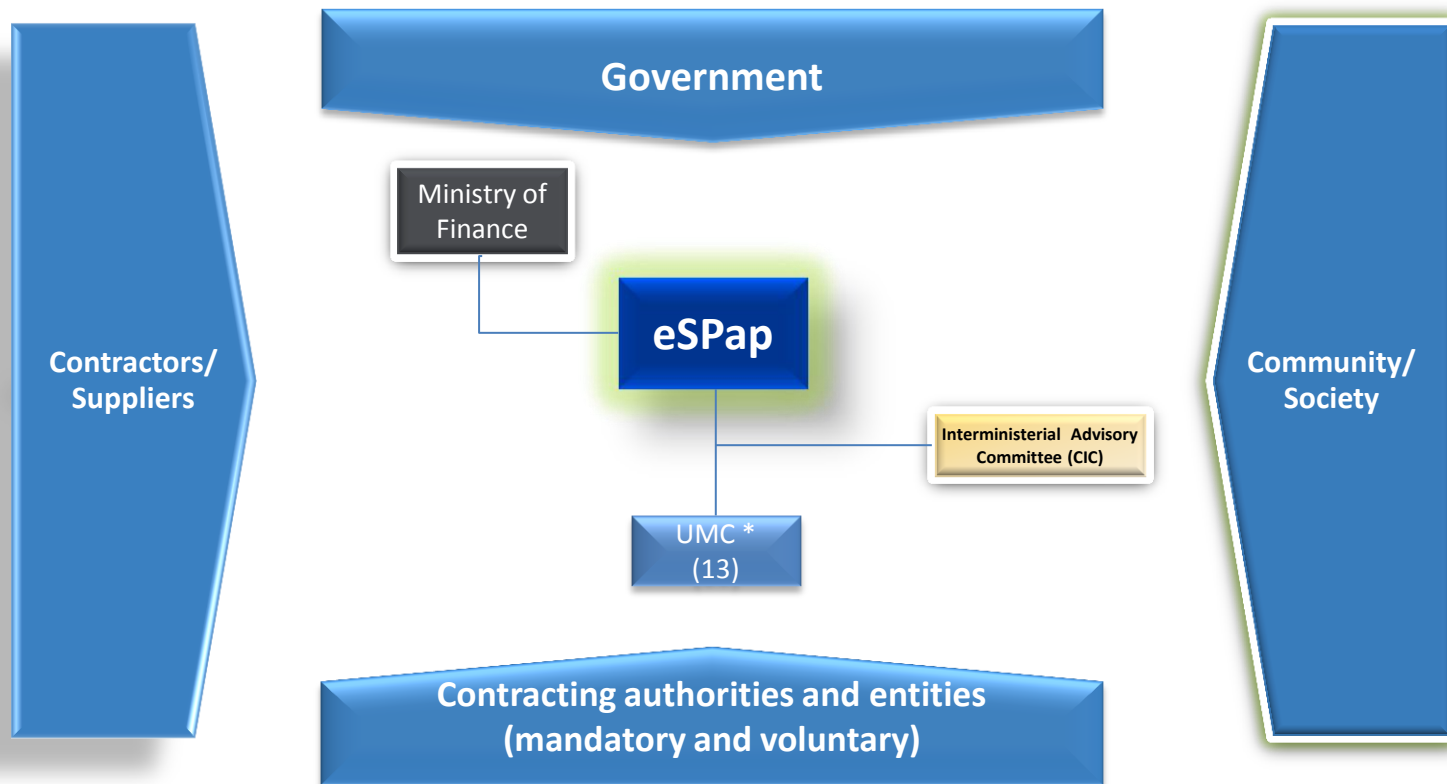

# The Portuguese Public Procurement System (SNCP)

- Hybrid model of management, based on a central management entity – ESPAP – articulated with ministerial purchasing units (UMC) and contracting authorities (CA), operating in a network;
- Integration of:
  - purchasing entities by law – “Mandatory entities” (1800+)
  - purchasing voluntary entities (c. 680);
- Centralization of the categories at ESPAP (Electricity, Natural Gas, Fuel, Vehicles and Car Insurance) or UMC \*;
- Acquisition under framework agreements (FA) established by ESPAP;
- Mandatory usage of e-tools in public procurement since November 2009.

\* UMC = Initialism in Portuguese for Ministerial Purchasing Units

# SNCP's Governance Model

\* UMC = Ministerial Purchasing Units. Some work as shared services units for multiple ministries. In total there are 17 Ministries.

## The top priorities in the setup

Between 2007 and 2010 the top priorities during the setup of the SNCP were:

- Launch of public tenders on transversal categories of goods and services in order to award framework agreements
- Development and implementation of a Technological Model
- Setup of a comprehensive Public Procurement Information System

1st step: to bring on board key stakeholders in the country and to involve the major players into the reform

# Categories of goods and services within SNCP (Framework agreements)

**Hardware** ● **Software Licensing**

Mobile Communications ● Landline Communications

**ICT - Design, management and development of infrastructures**

Technological consultancy ● E-Platforms

**Natural Gas** ● **Fuel** ● **Electricity**

**Cleaning Services and Hygiene Products** ● **Security and Surveillance**

**Maintenance of HVAC Systems** ● **Maintenance of Lifting Systems**

**Paper and Stationery** ● **Toners** ● **Copying and printing (outsourcing)**

**Furniture** ● **Meals** ● **Travelling and Hotels**

**Vehicles (acquisition and leasing)** ● **Electric Vehicles** ● **Car insurance**

**Fleet Management** ● ... ..

## Key stakeholders along this process

1st step: to bring on board key stakeholders in the country and to involve the major players into the reform

- Roadshows between 2008 and 2009 across the country
- Training, training, training

### Endorsement of the Government as a whole

- Public eTendering platform operators already established ● Contracting Entities (National, Local, Regional) ● Economic Operators ● External Auditors for Platform's compliance auditing ● National Certification Office of e-tendering Platforms – CEGER ● National Agency for Public Procurement - ANCP ● National Portal for Public Contracts ● Universities ● Municipalities ● Public companies ● Training Institutes ● Lawyers PP external consultants ● Court of Auditors ● Administrative Courts ● Media ● PR&Press ● Political institutions ● EU ● ...

# Main features of the legal regime

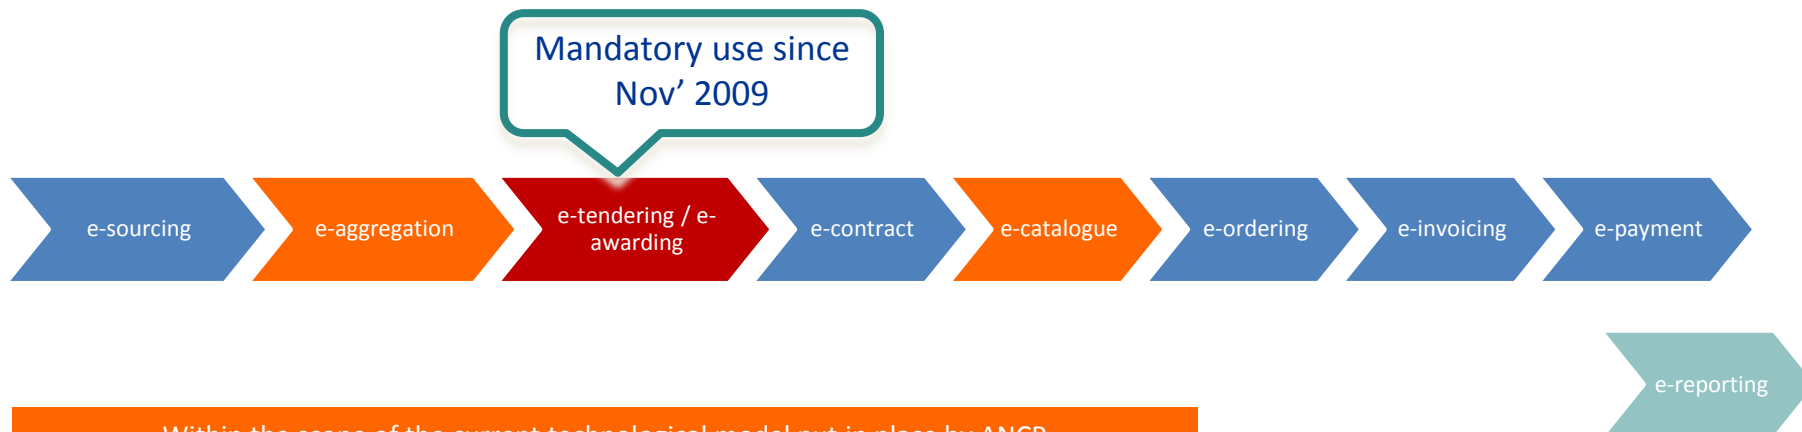

- The setup:
  - accreditation of e-platforms – license to operate
  - aggregation, centralization and UMC (like CPB) help delivering the change towards eProcurement (network)
- Public Contracts Law
  - Mandatory use of electronic means
    - The concept of “electronic means”
    - Operations covered
    - Selection of means depending on the type of procedure
  - Consequences of non-compliance
    - Contract formed through a non- eProcurement tool (“paper-based procedure”) is null and void (toughest sanction in Portuguese Administrative Law)
    - Disciplinary sanctions (eg. fines) towards public entity management

# A strategic tool for delivering envisaged results

- The procurement model:

- The eProcurement model:

## 11 years later...

- +300 M€ savings achieved between 2009 and 2016
- 12 valid framework agreements (39 since 2008)
- 256 active qualified suppliers
- +70% are SME
- +210k prices in the e-Catalogue (National Catalogue for Public Procurement (CNCP))
- +1800 mandatory contracting entities
- +680 voluntary contracting authorities
- c. 29 000 users with access to any of the SNCP's information systems
  
- Overall 62% level of eProcurement in Portugal in 2016 (€)

## How did we get here?

- The winner partnership / alliance towards the big change
  - Government
  - Industry (eProcurement operators and economic operators interested in accessing public markets)
  - Public Administration, at every level (tax payers, at the end of the day)
- The success factors
  - Attitude changing model: Legal, Economic, Educational/Training, Social Marketing
  - Overarching element: confidence
  - Three consistent pillars (Code, UMC/CPB, e(Public) Procurement)
  - Perception of gains and advantages
  - 4 Cs instead of 4 Ps \* => Work together, think out of the box, change for the better

\* 4 Cs: Critical thinking, Communication, Collaboration, Creativity

4 Ps: Product, Place, Price, Promotion

# The consolidation of the SNCP – The challenges ahead

Improvement of both the Efficiency and the Efficace of the SNCP

A. Governance Model	B. Qualified Procurer	C. Information Systems	D. Monitoring
<ul style="list-style-type: none"><li>• Governance of SNCP and Public Procurement</li><li>• Network coordination</li><li>• Levels of centralization</li><li>• Simplification and rationalization</li></ul>	<ul style="list-style-type: none"><li>• Empowerment of the procurer role</li><li>• Training / To reinforce competences</li><li>• Share of knowledge</li><li>• International experience</li></ul>	<ul style="list-style-type: none"><li>• Integrated system of data on procurement</li><li>• Interoperability of e-platforms</li><li>• Integration with relevant data systems from other entities</li></ul>	<ul style="list-style-type: none"><li>• Monitoring of the National Public Purchasing Plan</li><li>• Annual savings</li><li>• Procurement data</li><li>• Detailed public expense and unit negotiated prices</li></ul>

**Adequate legal and regulatory framework**

# Improving the qualifications of the procurer

- Public procurer as a strategic role

Coordinating

- Procurement operational forums (FOC)
- Sharing best practices
- Joint problem-solving
- Multidisciplinary teams
- Aggregated procurement procedures

Sharing information

- Taking part in sharing, training and qualification programmes
- Taking part in international projects

Improving  
competences

- The economic dimension of Public Procurement

FORMAÇÃO DE DIRIGENTES

CONTRATAÇÃO PÚBLICA (nova edição)

RACIONALIZAÇÃO E REDUÇÃO DA DESPESA: A AGRAGAÇÃO DE NECESSIDADES

Em parceria com a ESPAP

Objetivos

Conhecer os conceitos-base: compra racional, análise económico-financiera da compra, agregação de necessidades, procedimento por fases, preço-base, valor do contrato; Compreender o processo de agregação de necessidades; Conhecer o conceito de fragmentação da despesa.

Destinatários

Dirigentes

Técnicos superiores

Pré-Requisitos

Exercício de funções na área de compras públicas

1. MODALIDADE DE ENSINO:

Presencial

2. DURAÇÃO:

14 horas

3. LOCAL E HORÁRIO:

GESTÃO DO CONTRATO E MONITORIZAÇÃO DA DESPESA

Em parceria com a ESPAP

Objetivos

Conhecer as bases práticas na definição de SLA e a importância de sua sustentabilidade; Compreender a importância da monitorização da execução do contrato desde o seu início; Compreender a importância de uma gestão conjunta e regular do contrato; Conhecer as bases práticas na gestão do contrato; Compreender a importância do cumprimento de obrigações e deveres pelas partes.

Destinatários

Dirigentes

Técnicos superiores

Pré-Requisitos

Exercício de funções na área de compras públicas

1. MODALIDADE DE ENSINO:

Presencial

2. DURAÇÃO:

14 horas

3. LOCAL E HORÁRIO:

ESTRATÉGIAS DE SOURCING E PRINCÍPIOS DE NEGOCIAÇÃO

Em parceria com a ESPAP

Objetivos

Conhecer as possíveis estratégias de sourcing; Saber utilizar indicadores de desempenho na área das compras; Saber utilizar, entre outros, os conceitos de TQCLTVO; Conhecer os conceitos-base e as diferentes formas de negociação (tipos de negociação, leilão eletrónico).

Destinatários

Dirigentes

Técnicos superiores

Pré-requisitos

Exercício atual de funções dirigentes de nível intermédio;

Passo de FORGE/VALADP; Comissão de serviço subsequente à da conclusão da referida formação.

1. MODALIDADE DE ENSINO:

Presencial

2. DURAÇÃO:

20 horas

3. LOCAL E HORÁRIO:

Algarve, 9H00-18H00

COM AVALIAÇÃO

Portaria nº 146/2011, de 7 de

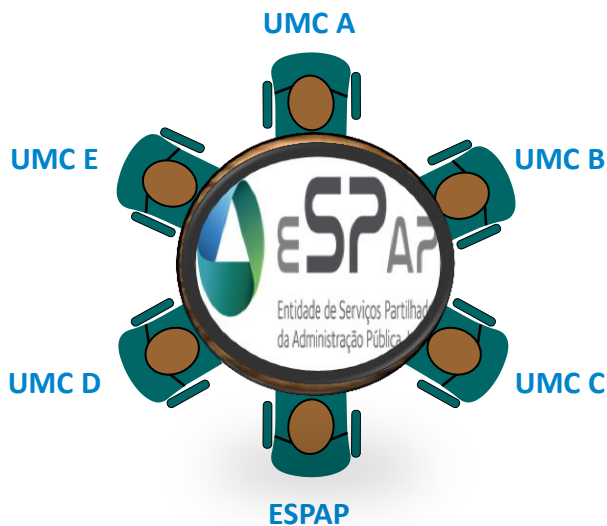

Modernisation  
of EU public procurement policy

Proposal of the Commission

# Share of knowledge - Procurement operational forums

## Agenda (Example)

- Presentation of new framework agreements (FA). How to prepare and launch call-offs under those FA
- Each UMC's major activities. Planned procurement procedures
  - Target categories
  - Status of on-going projects
  - Share of results, best practices, difficulties met
- Monthly activities' plan:
  - On-going and planned activities
  - Identification of common activities
  - Challenges
  - Action plan
- Evaluation of suppliers' performance:
  - Best practices in contract monitoring
  - Level of achievement of SLA
  - Issues with suppliers. Status. Challenges. How to overcome them
